Aim: Integration on the labour and training market

The aim of "MaBiA" is to supervise, support and initiate the integration process for newly arrived migrants. The focus is on enabling migrants to act independently in their everyday life to the extent that existing placement obstacles can be broken down. Consequently, they should be available (again) to the mainstream labour market, or should be made ready for it through further qualification. Fear of the unknown and placement obstacles are identified and broken down by way of intensive support.

Target group: SGB-II- and SGB-III recipients with a migration background

The target group is all SGB-II and SGB-III recipients with a migration background who require special support in terms of integration into the labour and training process:

- Newly arrived migrants
- Foreign beneficiaries who, due to (multiple) placement obstacles, have difficulties being integrated into the mainstream labour market
- Other persons with a migration background in actual migration-specific crisis situations
- They should have a basic knowledge of German

Content, activities and implementation of the measure

A "plan of action" is drawn up for each participant for the purpose of individual development. This can result in, among others, the following activities:

- Motivation discussions / encouraging personal initiative
- Support during discussions with authorities, training providers, employers, parents etc.
- Accompaniment on visits to official departments, visits to doctors etc.
- Support in the development of personal and professional future plans
- Communication with specialists at the job center
- Skill assessment, arranging for the acquisition of vocational skills
- Advice and ongoing assistance when starting work / training or qualification
- Support in getting proof of qualifications / qualifications gained abroad recognised
- Compiling application documents / familiarisation with the labour market
- Gaining or rebuilding social competence while unemployed
- Using social networks / cooperation with integration course providers
- Orientation help and support for integration into German culture etc.
